CENTRO TEMATICO INTERAZIONI

MISSION

- The Interactions Thematic Centre aims to integrate the data resources required to study the responses of **interacting individuals, populations and species** and analyse the mechanisms underlying **biodiversity organisation**.
- With this aim, the Thematic Centre produces tools and services to standardise, integrate and analyse data on inter-individual interactions at the scale (grain and extent) required.

Problem

Large amounts of relevant data...

....highly heterogeneous (format, content, semantics)

Heterogeneity impedes:

- Data Discovery
- Data Integration
- Data Re-usability

What do we need?

- Harmonization
- Standardization

in order to share information and to support and facilitate the research in this field

Solution

How can we do it?
