

LIFEWATCH ITALY

At the national level LifeWatch-Italy has established the **e-Biodiversity Research Institute**.

The **e-Biodiversity Research Institute** has branches distributed throughout Italy and seeks to reinforce integrated scientific research into biodiversity.

*Workshop
Thesauri & Semantics
in the Ecological Domain
9 – 10 giugno 2016 LECCE*

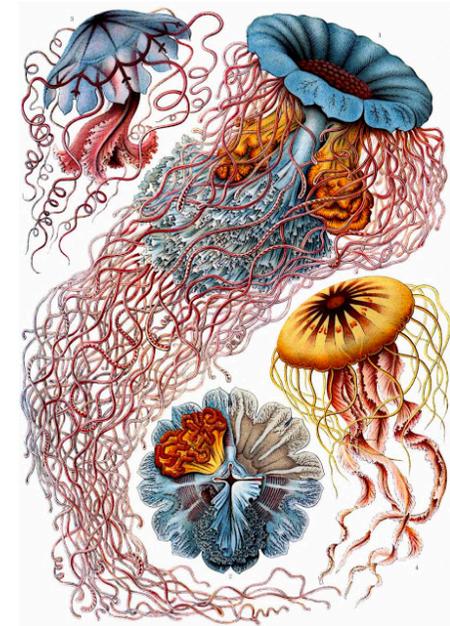

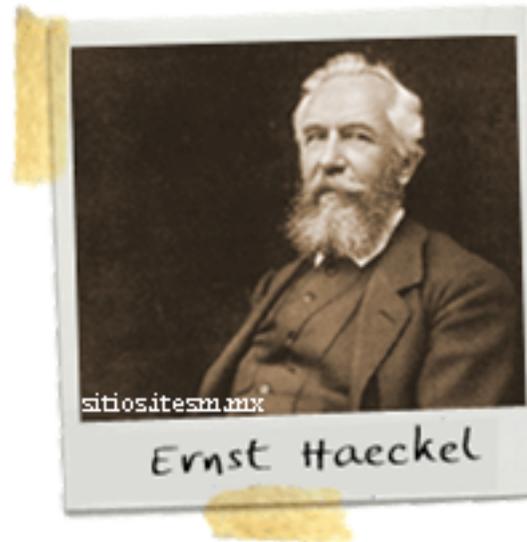

- ➔ Scientific facilities and equipment of LIFEWATCH are **the data**. Every experiment is possible in the LIFEWATCH virtual research environments if **required data are available**.
- ➔ Of course LifeWatch equipment need power to work and LifeWatch power is the ICT component of the e-infrastructure..
- ➔ LIFEWATCH is not actually a data repository, while can host data and products of different projects and initiatives guaranteing their sustainability

9 – 10 giugno 2016 LECCE

“By ecology, we mean the whole science of the relations of the organism to the environment, in the broad sense, all the “conditions of existence.” These are partly organic, partly inorganic in nature; both, as we have shown, are of the greatest significance for the form of organisms, for they force them to become adapted.”

E.Haeckel, 1866

I wish you two fruitful working days
